THEME CONFIGURATION

- Login to admin panel.
- Go to Content > Design > Configuration.
- Select the store for which you want to set theme.
- There will be following theme which is added by our module:
 - **Purpletree ShopAmaze**
- Select **Purpletree ShopAmaze theme** from dropdown and **Save Configuration**.
- You can set **Logo for header, welcome text etc.** from **Other Settings** belowon this page.

On successful installation, a new Menu and submenu will appear in magento Admin panel with name of **Purpletree**. It will have following sub menus

- Go to **Purpletree > ShopAmaze Items > Theme Configuration**.
- Now Enter License key you get with this extension in License key field.
If you haven't received license key, please contact our support team.
- License Status – Default it is set "To be Validated". It will get validated sometime later after you enter a valid license key.
- Defer JS – Select it to **Yes** to add all the Script js after HTML. It can used to optimize website performance

Note: Valid License Key is required to save any configuration changes. Contact theme author if you do not have it.

After changing options make sure you refresh your Magento cache.

IMPORT CMS BLOCKS AND PAGES

- **Import Static Blocks**

Click on this button to import Default Static blocks given with theme. Set it to “**No**”, if you don’t want to overwrite previously added static blocks with same identifier. If set to

“**YES**” all previous static block with same identifier with changes will be gone and default static blocks given with the theme will be imported afresh.

- **Import Pages**

Click on this button to import Default CMS Pages given with theme. Set it to “**No**”, if you don’t want to overwrite previously added CMS Pages with same identifier. If set to “**YES**” all previous CMS pages with same identifier changes will be gone and default CMS Pages given with the theme will be overwritten.

- **Import Default Configuration Settings**

Click on this button to import and set Default Configuration settings for ShopAmaze Theme.

SET HOMEPAGE

MANAGE SLIDES

A slide is a collection of many images (sliders), that can be shown within a carousel.

To add and edit slides, Go to **Admin > Purpletree > Purpletree Base Items > Manage Slides**.

<input type="checkbox"/>	ID	Slide	Name	Enabled	Created	Modified	Action
<input type="checkbox"/>	15		ShopAmaze Slide 1	Yes	Mar 13, 2019 2:28:06 PM	Mar 13, 2019 2:37:01 PM	Select ▾
<input type="checkbox"/>	16		ShopAmaze Slide 2	Yes	Mar 13, 2019 2:28:06 PM	Mar 13, 2019 2:36:57 PM	Select ▾
<input type="checkbox"/>	17		ShopAmaze Slide 2	Yes	Mar 13, 2019 2:28:06 PM	Mar 13, 2019 2:36:54 PM	Select ▾

Add/Edit Slide

Admin can add or edit slides which can be assigned to slider and that slider is assigned to Homepage from configuration.

Click on **Add New Slide** to create new slide.

- **Name** – Give the name for the slide, this name will only be used as **ALT** for image.
- **Link** – Give full link if you want to open new tab on click of this slide.
- **Enabled** – This must be set to **YES** for slide to show on homepage slider.
- **Sort Order** – Enter sort order number in which order the slide will come in slider.

- **Slide Image** – Browse and select image from your PC.
- **Click on Save Slide when done.**

The screenshot shows the 'ShopAmaze Slide 1' edit interface. At the top, there are navigation buttons: 'Back', 'Delete Slide', 'Reset', 'Save and Continue Edit', and a prominent orange 'Save Slide' button. On the left, a 'SLIDES INFORMATION' sidebar shows a list with one item labeled 'Slide'. The main area is titled 'Slide Information' and contains the following fields:

- Name ***: Text input field containing 'ShopAmaze Slide 1'.
- Link**: Text input field containing '#'.
- Enabled**: A dropdown menu currently set to 'Yes'.
- Sort Order ***: Text input field containing '0'.
- Slide Image**: A file upload section with a 'Browse...' button, the text 'No file selected.', and a 'Delete Image' checkbox.
