

## INSTALLATION

*Before installation, make sure the OpenCart Extension Installer is correctly configured, especially for the FTP settings, including the FTP Root. See*

*<<http://docs.opencart.com/extension/installer/>> for more details.*

1. Go to “Extensions” -> “Extension Installer”.

2. Upload the file product\_csv.ocmod.zip.
3. Go to “Extensions” -> “Modifications”. You should see an entry for this extension, by name of “Bulk Product Update”.

## Modifications

Home / Modifications

Whenever you enable / disable or delete a modification you need to click the refresh button to rebuild your modification cache!

### Modification List

General Log

### Edit User Group

\* User Group Name: Administrator

Access Permission

- tool/error\_log
- tool/export\_import
- tool/product\_csv
- tool/upload
- total/coupon

Select All / Unselect All

Modify Permission

- tool/error\_log
- tool/export\_import
- tool/product\_csv
- tool/upload
- total/coupon

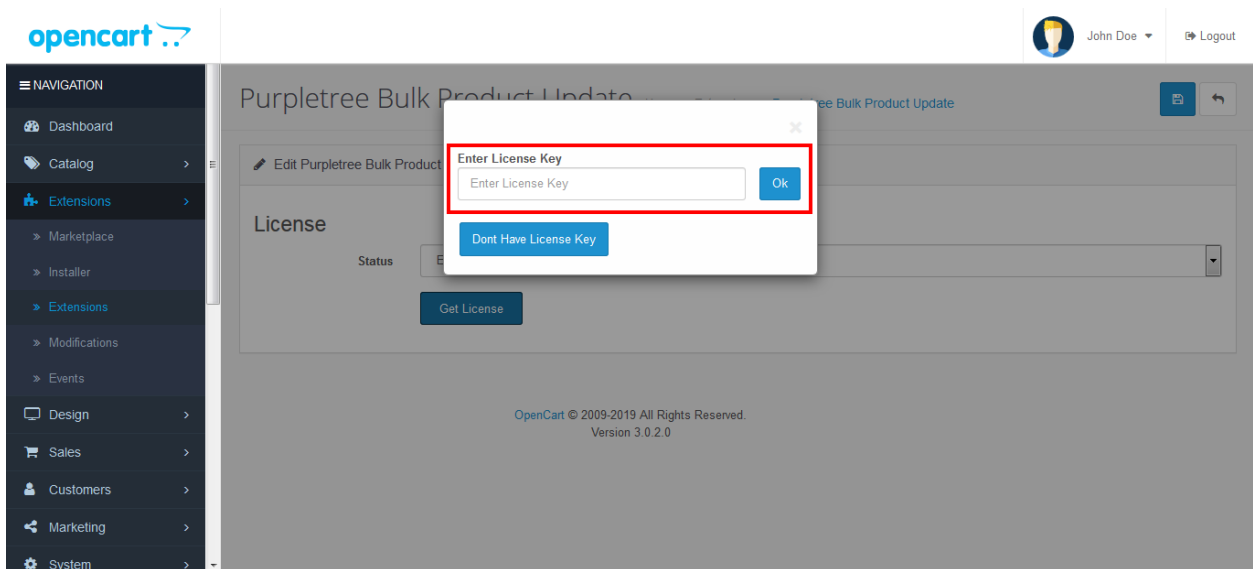

- Now go to “Extensions->extensions” and select modules, search for “Purpletree Bulk Product Update” and click on button 1 to install module then button 2 for editing status.

Purpletree Blog Setting	Enabled	 
<b>Purpletree Bulk Product Update</b>	Disabled	 
Purpletree Category Seller Featured Products	Enabled	 
Purpletree Custom Product Designer	Enabled	 

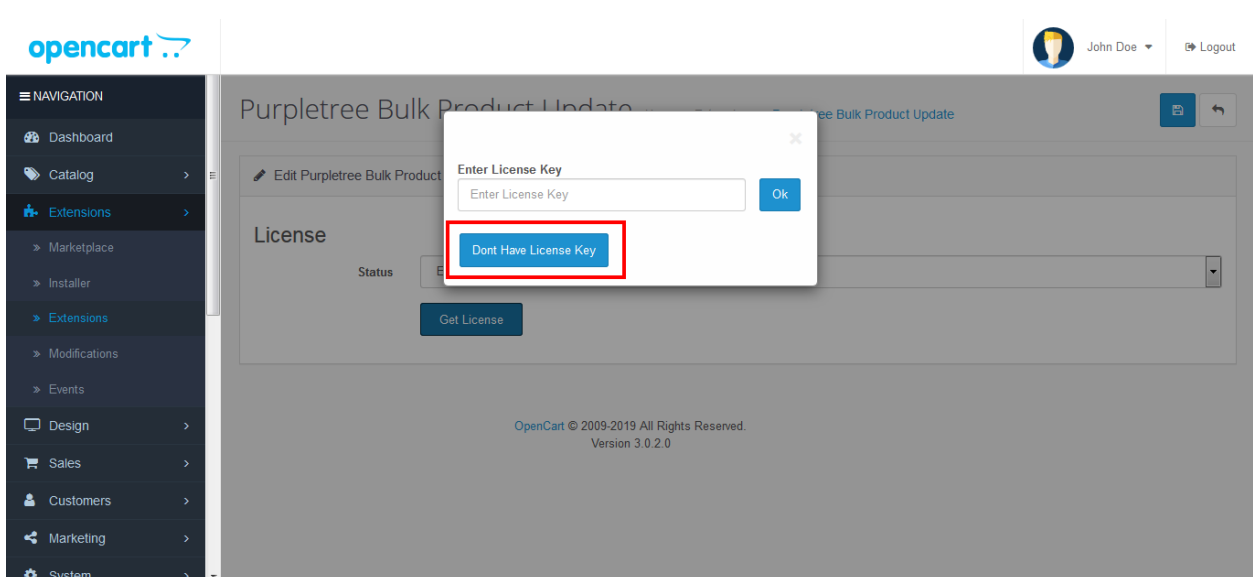

- You’ll reach on Purpletree Bulk Product Update setting page.
- First of all you will Enable the module status.
- After that click on “Get License” button. Enter License Key –This key is provided when you purchase the extension

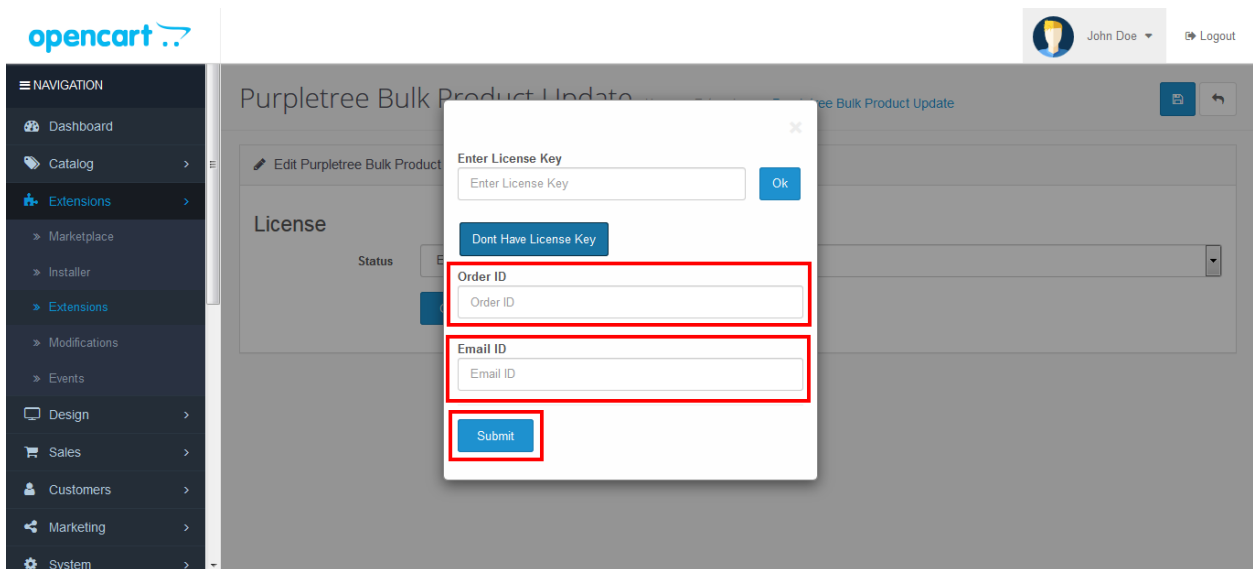

The screenshot shows the OpenCart admin interface. On the left is a navigation menu with 'Extensions' selected. The main content area is titled 'Purpletree Bulk Product Update' and contains an 'Edit Purpletree Bulk Product Update Setting' button. Below this is a 'License' section with a 'Status' dropdown menu set to 'Enabled' and a 'Get License' button. A red arrow points from the 'Get License' button to the text 'License key button'. The footer of the page reads 'OpenCart © 2009-2019 All Rights Reserved. Version 3.0.2.0'.

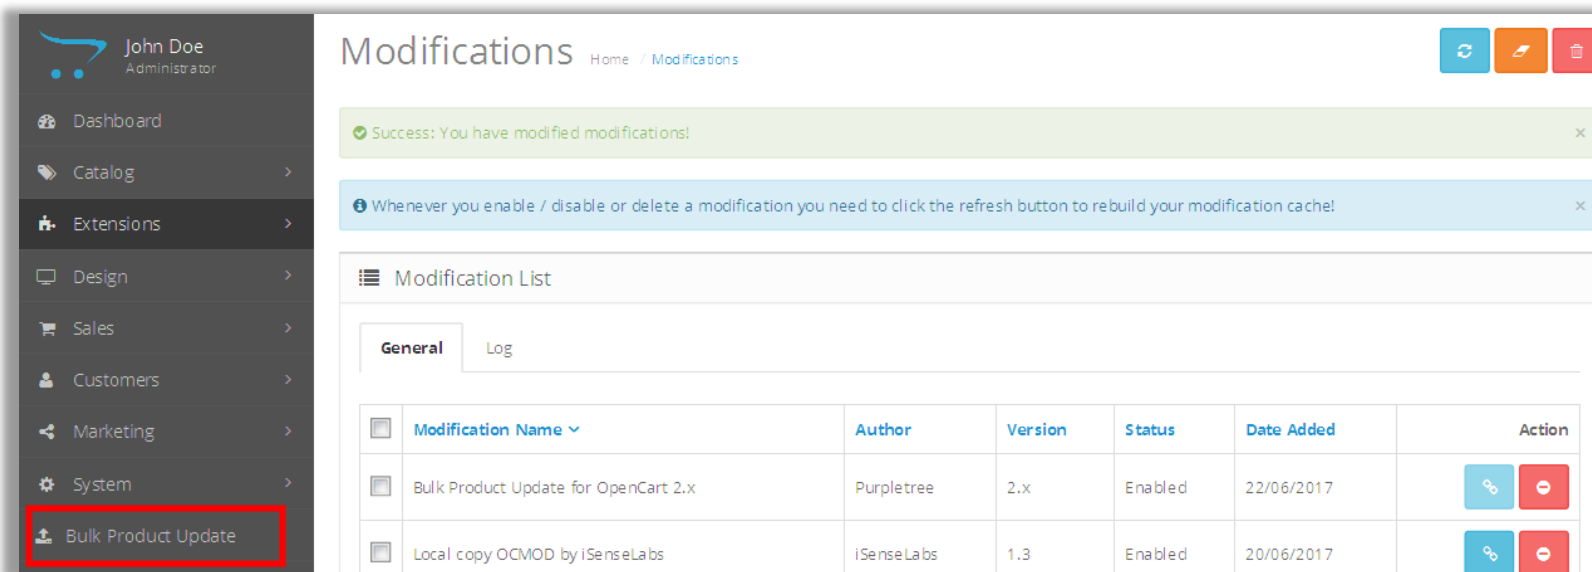

11. If you have not License key then, go to Admin >Extension> Extension > Purpletree Bulk Product update > Edit Module > Click on “Don’t Have License key” button. Enter your Order ID which was generated when you placed an order for our extension and “Email ID”. Click on Submit Button and your license key will be filled on License key.

12. After that click on save button.

13. You'll see the Bulk Product Update menu just above Reports menu.

## USAGE INSTRUCTIONS

1. Click on “Bulk Product Update” link on the admin menu on left panel.
2. Now export the product data, which you would edit later and upload. For that, use the Export Section on the page. Select the language for which you want to download products. The default language for the store will be selected by default. Now click on “Export” button.

*Note: In case of very less memory being available for the script, you may see error “Fatal error: Allowed memory size of XXXXXXX bytes exhausted (tried to allocate XX bytes)”. If error reporting is OFF, there could be a white page appearing instead of this error message on Export operation. In such a case, you need to ask your host to increased memory\_limit on your server to a reasonable number as per number of products in your store.*

The screenshot shows the admin interface for "Bulk Product Update". On the left sidebar, the "Bulk Product Update" menu item is highlighted with a red box. The main content area is divided into two sections: "Export" and "Import". In the "Export" section, the "Language" dropdown menu and the "Export" button are highlighted with red boxes. A red arrow points to the dropdown menu with the text "Select language from dropdown". The "Import" section has a "Language" dropdown menu, a "Browse..." button, and an "Import" button.

3. The exported csv file has following columns. Do not remove the first row, as it contains headers. You can edit any information on this file as part of product edit. There are following columns available in the csv file:
  - Product Id (this is system generated, do not change)
  - Product name

- SKU
  - Description
  - Stock status
  - Price
  - Meta title
  - Meta keywords
  - Meta description
4. Use “Import” section on the page to import the modified csv file. Upload csv file and select language from dropdown for which you want to update the data. Click on “Import” button.

*Note: In case of very less memory being available for the script, you may see error “Fatal error: Allowed memory size of XXXXXXX bytes exhausted (tried to allocate XX bytes)”. If error reporting is OFF, there could be a white page appearing instead of this error message on Import operation. In such a case, you need to ask your host to increased memory\_limit on your server to a reasonable number as per number of products in your store.*
